

AI-Empowered Green Skills Education: Online Course for High School Teachers

About the Course

This self-paced, fully asynchronous online course aims to help teachers from different subject areas discover how they can integrate green skills into their lessons. Throughout the course, educators will become familiar with the concept of green skills, explore ways to align these competences with their curriculum, and learn how to use artificial intelligence (AI) tools to develop educational materials. Participants will also have the opportunity to experience the process of creating Open Educational Resources (OER) with their students, focusing on the theme of green skills.

The course includes interactive content such as videos, quizzes, forums, and assignments, organized into 4 modules. To receive the Green Skills Ambassador certificate, participants must complete all activities and score at least 60% on the final test.

Enrollment

This course has open enrollment. Students can self-enrol via this link:
