

Video Lessons for High School Teachers

EAIEN Youtube Channel

This channel has been created within the scope of the EcoAI EduNetwork Initiative (EAIEN) Project to store and publicly share the videos produced throughout the project. By publishing the materials here, we aim to support open access, enhance visibility, and disseminate the project results to a wider audience including teachers, students, and stakeholders.

A total of 21 videos have been prepared as part of the online course (LTTA) named AI-Empowered Green Skills Education. Below, you can find the distribution of the videos across the modules, their topics, and the direct links to access them through our project's YouTube channel.
