RECYCLING HELPS YOU PROTECT NATURE

Why Recycling Matters for Young Children

You produce paper, plastic, and metal every day. If you throw them in the trash, they end up in landfills. These places take up space and affect the soil.

How You Can Recycle

You sort the materials into different bins. You put paper in one box, plastic in another, and metal separately. You rinse bottles before putting them in the container.

What Benefits You See Quickly

You notice a cleaner space at home. You see containers better organized at school. You learn to take care of your things.
