All about recycling!

Recycling is the process of taking old or used materials and turning them into new items instead of throwing them away. It helps protect the environment, saves energy, and reduces the amount of trash that ends up in landfills.

Why is recycling important?

Saves natural resources
Reduces energy

Reduces pollution
Protects wildlife

What materials can be recycled?

Paper & cardboard

Plastic

Glass

Metal

Electronics

How does recycling work?

Collecting

Sorting

Cleaning

Processing

Remaking

How can YOU help?

Put recyclable items in the correct bin

Rinse containers before recycling them

Reuse items when you can, like bags or jars

Try to buy products made from recycled materials
